

OLYMPUS

Your Vision, Our Future

Microscopy
OEM Solutions

Whatever you create, we support it.

More than the sum of our parts: Olympus Microscopy OEM.

No form without function.

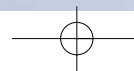

In order to construct something, you need the right parts. This may sound elementary, but this is the key to any successful project. Because once you start making compromises even in terms of the fine details, try to cover up mistakes by improvising, or simply make use of poor-quality components, the results are no longer acceptable. You may not immediately be able to tell by looking at the exterior – but as soon as demands are placed on the equipment in practice, any weaknesses in the planning stage swiftly become all too obvious.

No creativity without inspiration.

As Europe's leading manufacturer of professional microscopy systems, Olympus gives you the certainty of always having exactly the right solution for your specific project. Our unique opto-digital expertise and broad international experience are not merely characteristic of every single component that we supply you with, but also of our entire working relationship: with our top-quality, speedy service, tailor-made support and personal commitment, we are the right partner for flexible, creative OEM solutions.

Place your trust in Olympus' know-how for your projects and plans – you can count on us to be right behind you.

Components that fit your needs – piece by piece.

Your project is our project.

Every microscopy project calls for highly specific requirements in terms of the technology used. With Olympus' opto-digital know-how, you can rest assured that we will find the perfect solution for all your demands and queries – and all without compromising on quality and functionality. We approach every single project with our full commitment, as well as a high degree of flexibility and personal dedication. You will benefit from our highly qualified staff drawing on their expertise to guarantee the smooth and straightforward development of your project throughout the three fundamental project stages of design, integration and production. In other words, you will have direct access to the experience Olympus has gathered in the international world of microscopy, allowing you to implement this knowledge in a targeted way to suit your needs. In this way, Olympus becomes a major “building block” which is crucial to the success of your project. However high you want to go, we will act as your solid foundations.

Phase I: design.

On the basis of your enquiry, we will start by jointly establishing the fundamentals of your working relationship with Olympus. We then hammer out the finer details of your project, starting with defining specifications and carrying out feasibility studies, through to presenting you with a concrete solution proposal incorporating all the relevant details such as technical drawings, data, pricing and availability.

Our services:

- Project management
- Fast and precise optical consultancy with access to Olympus' global knowledge pool
- Provision of all the necessary optical data
- Running of optical simulations
- Presentation of a comprehensive solution package

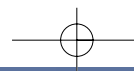

Phase II: integration.

Once the design phase has been completed, we focus on the finer details of integrating the Olympus OEM parts into the project. This entails every single component undergoing practical testing and evaluation.

Our services:

- Instruments for practical testing
- On-site support
- Flexible adaptation of the solution proposal in line with the concrete requirements

Build on our experience.

Phase III: production.

On successfully completing the design and integration phases, we advance to the production stage – with continued supervision and consultancy down to the last detail. With our direct access to all of the Olympus production sites around the world, you will have a wide individual scope of action.

Our services:

- Project and key account management
- Flexible production volume
- Guaranteed long-term availability of Olympus OEM components

A good connection: contact with Olympus OEM.

Which areas of the Olympus OEM portfolio would you like to know more about? Simply tear off the attached card, fill it in and send it back to Olympus – we will then provide you with all of the necessary building blocks for the straightforward and reliable planning of your project. Or alternatively, contact us directly by e-mail (oem@olympus-europa.com) or phone: +49 (40) 23 7739 46.

With special thanks to Naef Spiele AG (www.naefspiele.ch) for their support.
