

CL2 Stand Clip

- Attach it to the recorder as a stand
- Clip the recorder to a music stand

Two Way Stand Clip

The CL2 Stand Clip can be used in two different ways, which is a stand and a clip. The Stand Clip can be screwed onto the tripod hole of the LS-12/14 series. If you screw the stand clip in the upright position, it can be used as a stand. On the other hand, by changing the screw position on the Stand Clip sideways, you can use it as a clip in order to attach the recorder to a music stand for self recording.
