

RS32 Hand Controller

- Remote recording function to control voice recorders
- Universal form to fit with various keyboards and notebooks
- Detachable hand wrist rest to be flexible and mobile
- Long and durable USB cable
- Individually configurable buttons via software
- Soft silicon rubber-pads on wrist rest for comfortable transcription
- Dictation playback control of voice recording when connected with docking station
- Odd-shaped surface to set the natural hand positioning

Hand controller

The Olympus hand controller is made for more than “just” transcription. The control unit can be detached from the wrist rest in case you want to be mobile. Either for comfortable transcription on location or to control a voice recorder from the distance. The ergonomic button design allows to easily find the particular button without looking at it. Non-slip mats underneath the hand controller guarantee that the unit stays at the right place.
