

FCON-T01 Fisheye Converter

- Shoot creative and unique images with a rounded, 130-degree angle, effect
- Easy attachment to the camera even under water up to a depth of 12m
- Wider viewing angle with extended focal length of 19mm

Discover new perspectives

Unlike with most cameras in the compact class, you can attach waterproof converters and 45mm lens filters to the high-class TG-series using the CLA-T01 conversion lens adapter. The fisheye converter lens FCON-T01 allows wide-angle shooting without sacrificing the brightness of the f2.0 lens. Even in darker underwater scenes, you can shoot wider, more dynamic images that reproduce the beauty of the underwater world.

Specifications

Lens Construction

Maximum image magnification	0.74x
Angle of view	130°
Lens configuration	3 elements / 3 groups

Compatibility

Compatible devices	TG-1
--------------------	------

Lens Combinations

	Focal length: 19mm (35mm format)
TG-1	Closest focusing distance: 0.06m
	(Focal length set to maximum wide position recommended)

Dimensions

Screw diameter	40.5mm
Weight	125g
Length	27.2mm
Diameter	65mm

Tough Features

Dustproof	Yes **
	* According to IEC standard publication 529 IPX8
	** According to Olympus test conditions
Waterproof	12m (water pressure equivalent to depth) *
