

## E-System Bag

- Case for storage and transportation
- For all E-System cameras

---

### Safe storage and transportation

This system bag is a must for every professional photographer. Due to its variable segmentation, it fits perfectly to the individual requirements of a photographer's worklife. To lighten the weight the inner part is also removable if required, and with its dust and weather protection coating as well as a waterproofed zipper, it can be used under most climatic conditions. Due to just one clasp at the front side an easy and quick access is possible. For better memory card handling an additional card case is attached to the system bag. Fits: 1-2 Pro-SLR camera bodies, 5-6 lenses, Pro-flash system, further accessories. Dimensions: 36x18.5x25cm (inner), 41x28x30cm (outer). Outer fabric: water-resistant 600D TXP™ ripstop and 2000D ballistic nylon.
